### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance:

The present application relates to a process for generating collision signals. According to the claimed invention, a core signal is derived by low-pass filtering an actually measured collision signal. The core signal, according to the claimed invention, is split into a plurality of chronological sequential signal segments, wherein each of the signal segments is transformed into simulated signal segments using a respective transmission function having an input. The claimed invention further sets forth combining the transmission function to form an overall transmission function and forming at least one descriptive collision signal by varying at least one parameter of the overall function. The aforementioned limitations and combination thereof are not taught in the prior art. In light of the foregoing, the claims of the present application are found to be patentable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jacques H Louis-Jacques whose telephone number is 703-305-9757. The examiner can normally be reached on M-Th 6:30 AM to 5:00 PM.
